Abstract

Manubot Rootstock Information

Note: Manubot instances should delete this file.

The Manubot is a system for automating scholarly publishing. Content is written in [Pandoc Markdown](#) source files. See `USAGE.md` for more information on how to use the Manubot.

The Manubot project began with the [Deep Review](#), where it was used to compose a highly-collaborative review article [1]. Another example manuscript that was created with Manubot is:

- The Sci-Hub Coverage Study ([GitHub](#), [HTML manuscript](#)) [2]

If you notice a problem with Manubot, it's best to submit an upstream fix to the appropriate repository:

`greene1ab/manubot-rootstock` for the git repository stub or `greene1ab/manubot` for the Python package.
